

IN THE CLAIMS

Please amend the claims to be in the form as follows:

Claims 1-15. (Canceled)

16. (Previously presented) An apparatus for supporting a keyboard, comprising:

a frame member having an upper end and a lower end; and
means for attaching the upper end of the frame member to a monitor such that the lower end of the frame member extends from a lower portion of the monitor to support the keyboard, wherein the keyboard is split along a longitudinal axis to allow the keyboard to fold along the longitudinal axis.

17. (Previously presented) The apparatus as recited in claim 16 further comprising a ramp attached to the frame member between the upper end and the lower end, wherein the ramp is configured to slidably reposition the keyboard.

18. (Previously presented) The apparatus as recited in claim 16 wherein the frame member is configured to move from an extended position away from a lower surface of the monitor to a retracted position towards the lower surface of the monitor.
